ALPHABETIC LIST OF COMPANIES	84
------------------------------	----

Mašīnbūves un metālapstrādes rūpniecības asociācija (MASOC) kopš 1994.gada pārstāv asociācijas biedru un nozares kopējās intereses un īsteno kopīgus projektus biedru un nozares konkurētspējas stiprināšanai. MASOC apvieno virs 170 vadošos nozares uzņēmumus, saistītos pakalpojumu sniedzējus, pētniecības un izglītības institūcijas.

GALVENIE DARBĪBAS VIRZIENI IETVER:

INTEREŠU PĀRSTĀVNICĪBA

Pastāvīgi tiek nodrošināta sadarbība un dialogs ar valsts pārvaldes institūcijām, lai sekmētu nozares attīstībai būtisku jautājumu risināšanu. Pārstāvot biedru intereses tiek nodrošināta cieša sadarbība ar Latvijas Tirdzniecības un rūpniecības kameru un Latvijas Darba devēju konfederāciju. Eiropas līmenī intereses tiek pārstāvētas ar Eiropas Inženiernozaru asociācijas ORGALIME starpniecību, kuras biedrs ir MASOC.

IZGLĪTĪBA, CILVĒKRESURSU ATTĪSTĪBA UN JAUNATNES PIESAISTE

Tiek īstenota sadarbība ar visām nozīmīgākajām profesionālās un augstākās izglītības institūcijām, Izglītības un zinātnes ministriju, kā arī organizēti pasākumi jaunatnes piesaistei mācībām un studijām inženierzinātnēs un nozarei būtiskās profesijās. Viens no MASOC organizētajiem projektiem – Tehnobuss, ir ceļojoša mobila demo laboratorija, kura ir aprīkota ar modernām tehnoloģijām un ikdienā organizē nodarbības skolās ar mērķi ieinteresēt jauniešus inženierzinātnēs. Apmācību projekta ietvaros uzņēmumiem ir pieejams atbalsts darbinieku kvalifikācijas celšanai un tālākpmācības kursu īstenošanai.

MĀRKETINGS UN EKSPORTA VEICINĀŠANA

Asociācijas biedru produkti, tehnoloģiskās iespējas un sadarbības piedāvājumi tiek reklamēti starptautisko izstāžu, vizīšu un tirdzniecības misiju ietvaros. Ik gadu tiek publicēts uzņēmumu katalogs LATVIAN METAL INDUSTRY, kas ietver informāciju par visu asociācijas uzņēmumu piedāvāto produkciju, pakalpojumiem un tehnoloģiskajām iespējām. Tiek organizēti kopīgi stendi starptautiskajās izstādēs un braucieni uz kontaktu veidošanas pasākumiem, piesaistot atbalstu no ES fondiem.

SAVSTARPĒJĀ SADARBĪBA UN KOOPERĀCIJA

Savstarpējā sadarbība un kooperācija tiek veicināta īstenojot kopīgus projektus un pasākumus, kā arī nodrošinot nepieciešamās informācijas apmaiņu. MASOC pastāvīgi uztur un atjauno datu bāzi par uzņēmumu tehnoloģiskajām iespējām un kompetencēm, līdz ar to atvieglojot sadarbības partneru meklēšanu. Regulāri tiek rīkoti kopīgi pasākumi, kuru ietvaros ir iespējas neformālo kontaktu veidošanai ar citiem nozares uzņēmumiem, zināšanu un labas prakses apmaiņai.

PĒTNIECĪBA UN INOVĀCIJAS

Mašīnbūves kompetences centra ietvaros tiek sniegts atbalsts jaunu produktu un tehnoloģiju attīstības projektiem. MASOC cieši sadarbojas ar augstākās izglītības un pētniecības institūcijām, t.sk. iesaistoties kopīgos inovāciju projektos ar studentiem. Arvien lielāks uzsvars tiek likts uz digitalizāciju un progresīvo ražošanas metožu ieviešanu, kur iesaiste nacionālā un Eiropas līmeņa platformās MASOC biedriem dod piekļuvi zināšanām, ekspertu atbalstam un jaunākajiem digitāliem risinājumiem.

INFORMĀCIJA

Pastāvīgi tiek analizētas nozares attīstības tendences gan Latvijā, gan galvenajos eksporta tirgos. Tiek analizēta tehnoloģisko iespēju attīstība nozares uzņēmumos, situācija ar ražošanas jaudu noslodzi, esošajiem un trūkstošajiem speciālistiem, kā arī cita ar nozares attīstību saistīta informācija. Potenciālajiem sadarbības partneriem MASOC piedāvā atbalstu sadarbības partneru piesaistē un kontaktu veidošanā.

Lai kļūtu par pilntiesīgu biedru, piedalītos aktivitātēs un pilnvērtīgi izmantotu biedriem sniegtās priekšrocības aicinām iepazīties ar kārtību kā kļūt par biedru.

Since 1994, the Association of Mechanical Engineering and Metalworking Industries (MASOC) has been representing the common interests of the association's members and industries and has been implementing joint projects for strengthening the competitiveness of the members and the industry. MASOC brings together more than 170 leading industry companies, the related service providers, research and education institutions.

THE MAIN AREAS OF ACTIVITY:

REPRESENTATION OF INTERESTS

Cooperation and dialogue with public administration institutions is provided constantly in order to contribute to solving the issues important for industry development. By representing the interests of its members, close cooperation with the Latvian Chamber of Commerce and Industry and the Employers' Confederation of Latvia is provided. At the European level the interests are represented through the European Engineering Industries Association ORGALIME, MASOC being a member of it.

EDUCATION, HUMAN RESOURCES DEVELOPMENT AND YOUTH ATTRACTION

Cooperation with all major professional and higher education institutions and the Ministry of Education and Science is organised, as well as activities for attracting young people to studies of engineering sciences and industry related occupations are being implemented. One of the projects organised by MASOC – Tehnobuss – is a travelling mobile demonstration laboratory equipped with modern technologies that organises daily classes for schools with the aim of promoting interest in young people about engineering sciences. Within the training project companies are provided support for increasing the qualification of their staff and for implementation of the further training process.

MARKETING AND EXPORT PROMOTION

Products, technological capabilities and cooperation offers of the association members are promoted at international exhibitions, visits and trade missions. Every year the company catalogue LATVIAN METAL INDUSTRY is published, which includes information on the products, services and technological capabilities offered by all companies of the association.

MUTUAL COOPERATION AND COLLABORATION

Mutual cooperation and collaboration is promoted through the implementation of joint projects and activities, as well as by providing the necessary exchange of information. MASOC constantly maintains and updates the database on the technological capabilities and competences of the companies, thus facilitating the search for cooperation partners. Regular events are held, during which there are opportunities for creating informal contacts with other companies in the sector, exchange of knowledge and good practices.

RESEARCH AND INNOVATION

Mechanical Engineering Competence Centre is an initiative established by MASOC that provides support for development of new products and technologies. Close co-operation is ensured between MASOC and higher education and research institutions, including involvement of students in innovation projects. Digitalisation and advanced manufacturing is another area where MASOC is involved in several National and European level platforms. This provides MASOC members with access to top knowledge, expertise, tools and solutions in the area of digitalisation and advanced manufacturing.

INFORMATION

The development trends of the industry both in Latvia and in the main export markets are constantly analysed. The development of technological capabilities in companies of the industry, the situation of the production capacity load, the existing and missing specialists, as well as other information related to the development of the industry is analysed. MASOC offers support to the potential members for attracting cooperation partners and establishing new contacts.

SUBCONTRACTING

Many of the companies in the sector are involved in subcontracting activities. Altogether the member companies cover the whole spectrum of metal processing technologies making it possible to produce parts and components of any level of complexity. MASOC constantly maintains a database of technological capabilities of the member companies making it possible to find the right supplier both for local and foreign partners.

PARTNER SEARCH

We offer information about technological capabilities and competences of the companies; assistance in finding suppliers and cooperation partners; effective subcontracting network covering the whole range of metal processing technologies; single contact point for information and inquiries. We offer organisation of incoming trade missions and site visits to our member companies. Potential partners are welcome to contact MASOC and we will help to arrange B2B meetings and assist with logistics support.

Number of employees: 65
Turnover in 2023 EUR: 9 400 000
Turnover in 2022 EUR: 9 900 000
Turnover in 2021 EUR: 6 500 000
Main markets: Germany; Norway; Sweden; Finland; France; Poland
Year of foundation: 2002

Business profile: Nodular and grey iron castings for various applications. Casting weight up to 100 kg. Machining of raw castings and surface treatment. Sand-based machine moulding line +GF+ with flask size 600x700x300/300. Annual capacity 3500 tons. The strength of the foundry consists of efficiency and flexibility based on small and medium sized series. Our pattern shop offer prototyping, competitive models based on 3D technology and skilled craftsmanship
Looking for cooperation in the area of: Manufacturing of nodular and grey iron castings for various applications
Technology facilities in company: Iron casting; Surface grinding; Design services CAD; Rapid prototyping; Shot blasting; Wet painting; 3D coordinate measuring (CMM); Chemical composition tests of metal; Mechanical property tests of metal; Non-destructive tests (NDT); Design of moulds and dies; Production of moulds and dies
Certificates in use: ISO 9001; Lloyd's; DNV, GL, LRS, RINA, RMRS, ABS, BV, CCS; DNV GL; ISO 14001:2015; ISO 45001:2018; ISO 50001:2018

Turnover in 2021 EUR: 1 611 400
Main markets: Germany; Latvia;
 Norway; Sweden; Denmark; Finland;
 Lithuania; Estonia; Czech Republic;
 Slovakia; Switzerland
Year of foundation: 2012

Business profile:

CNC SAAN main business profiles are CNC machining and steel structures manufacturing. Company was established by professionals, who have gained experience in international manufacturing sectors and are able to provide high quality solutions for customers. Company provides services as a subcontractor for small and medium volumes to customers, that specialize in production fields as Industrial equipment, Agriculture, Energetics, Processing equipment, Oil & Gas, Mining, Nuclear research.

CNC SAAN have CMM measuring machine and 21 different CNC machine centres, where maximum machining parameters are: milling (horizontal and vertical) - max 6000x1260x1750 mm, turning up to D 700x3000 mm and 5 axis turning – milling centres. Involving our collaboration partners "CNC SAAN" also provides the following services like hardening, galvanizing, anodization and painting

Looking for cooperation in the area of: Company is looking for partners in various industry sectors for subcontracting to CNC machining and steel structures manufacturing

Technology facilities in company: Sawing; CNC machining centres; CNC milling; CNC turning; Milling; Turning; 3D coordinate measuring (CMM); MIG/MAG welding; TIG welding

Certificates in use: ISO 9001:2015

Turnover in 2023 EUR: 1 550 000
Turnover in 2022 EUR: 1 300 000
Turnover in 2021 EUR: 910 000
Main markets: Latvia
Year of foundation: 2014

Business profile: DAUPRO business provides high quality welding service as well as production of different metal constructions. During the years of work company has gained considerable experience in welding of mild steel, stainless steel. Our professional welders can produce various complexity welded constructions, such as - stainless steel railings, service platforms, ladders, ramps for people with disabilities, benches in parks, bus sheds, etc

Looking for cooperation in the area of: Scandinavian market

Technology facilities in company: Sawing; Design services CAD; CNC tube bending; Roll bending; Tube bending; Polishing, buffing; Powder coating; Shot blasting; Wet painting; MIG/MAG welding; Shield-metal arc welding; TIG welding

Certificates in use: EN 1090-1; EN 1090; TUV Welding certificate; EN 1090-1+A:2011; EN 1090-2+A:2011; Welding Certificate

DSR LV

Legal form: Ltd.
Reg. No.: 40003061350
Address: Varšavas iela 28,
 Daugavpils, LV-5404
Phone: +371 20040586

Number of employees: 7
Turnover in 2023 EUR: 295 000
Turnover in 2022 EUR: 140 000
Turnover in 2021 EUR: 87 030
Main markets: Germany; Baltic
 states; Poland; India; Turkey;
 Middle East
Year of foundation: 1992

Business profile: The company has two lines of business:

1. Casting, forging of the desired shape from any type of lead or lead alloy. The company manufactures lead shot and bullets, ballast lead shot, lead and aluminum seals.

2. Production of products for the aviation industry according to customer drawings from steel, stainless and heat-resistant steel, aluminum, titanium, brass and plastic. We offer production of high precision parts and products with special requirements for quality and durability. We accept orders from one prototype to hundreds of parts. That we also provide services in the production on the basis of soft metals (Pb, Zn, etc.) Production of smooth-bore ammunition, production of plastic parts up to 150 g. We are interested in placing orders with manufacturers who have modern equipment and production methods with a modern metal product quality control laboratory

Looking for cooperation in the area of: Outsourced production based on soft metals (Pb, Zn etc.) Ammunition manufacturing. Plastic parts manufacturing up to 150g weight. Interested in placing orders with manufacturers who have modern CNC-machinery and production methods. Interested in cooperation with companies that have modern laboratories for quality control of metal products

Technology facilities in company: Casting of non-ferrous metal ingots; Casting of plastics; Hardening

EAST METAL

Turnover in 2021 EUR: 2 791 091
Main markets: Germany; Sweden;
 Denmark; Italy; Switzerland;
 Netherlands
Year of foundation: 2003

Business profile: EHT FABRIK Ltd. is a leading supplier of precision sheet metalwork in Latvia, providing all our in-house services within 3350 square meters of a purpose-built working space. CNC punching/laser/forming/tapping, laser cutting, CNC bending, CNC inserting and stud welding, TIG/MAG welding, robot welding, 3D CMM inspection, vibro tumbling, tube sawing, INOX & aluminum surface grinding, ceramic shot blasting, engineer services & prototyping, "clean stainless" steel processing.

We specialize in design, manufacture and assembly of bespoke sheet metal enclosures and precision sheet metalwork where quality and visual appearance are of essential value. Our strong quality driven team and ERP system allows walking an extra mile in order to produce innovative ideas on how to manufacture high-quality and cost-efficient products while eliminating a possibility of human error

Looking for cooperation in the area of: Automotive line components, Optics, ICT sectors, Audio and Electronics

Technology facilities in company: CNC Laser cutting; CNC punching (perforating); Sawing; Surface grinding; Rapid prototyping; CNC Sheet metal bending; Barrel finishing, tumbling; Shot blasting; 3D coordinate measuring (CMM); MIG/MAG welding; Robot welding; Spotwelding; TIG welding

Certificates in use: ISO 9001:2015

 Netherlands
Year of foundation: 2010

Business profile: Subcontractor of sheet metal cutting, bending services. Final product- prefabricated sheet metal parts made on customer order. Additional services (welding, surface treatment, machining) upon request and availability. For defence industry full production cycle according standards (cutting, bending, welding, painting). Including ballistic steel structures.

Laser cutting- with table layouts up to 8150*2600 mm with bevel cut, drilling and threading option.

Bending- up to 8000,- mm with 1000,- ton power.

Plasma cutting- table layout up to 4000*20000,- mm

Looking for cooperation in the area of: Based on our business profile

Technology facilities in company: CNC gas cutting; CNC Laser cutting; CNC plasma cutting; Sawing; CNC Sheet metal bending; Shot blasting; Wet painting; 3D coordinate measuring (CMM); Non-destructive tests (NDT); MIG/MAG welding; TIG welding

Certificates in use: ISO 9001; ISO 14001; ISO 9712; EN 1090-2; AQAP-2021; ISO 9606-1; ISO 50001; EN ISO 14732; ISO 2768-1; ISO 2768-2

EMJ Metāls
 Offering sheet metal cutting and bending services since 2010. Our expertise lies in crafting prefabricated sheet metal parts tailored to customer orders.

Our technological capabilities include:

- laser cutting tables with dimensions up to 8150*2600 mm
- plasma cutting tables layout extending up to 4000*20000 mm, complete with bevel cut, drilling, and threading options
- press brakes are equipped for bending sheet metal up to 8000 mm with a power of 1000 tons

In addition to cutting and bending, we provide supplementary services such as welding, machining, and surface treatment (available upon request). We maintain a substantial stock of raw materials to ensure prompt and efficient service.

Turnover in 2022 EUR: 400 000
Turnover in 2021 EUR: 300 000
Main markets: Latvia; EU; Lithuania; Estonia; Iceland
Year of foundation: 2018

Business profile: Production, design and assembly of various metal constructions. We create many different types of metal structures using the latest in metalworking technologies. We work together with each of our clients to find the best solutions. Main services: Metal and aluminium structures - Design items; Metalworking; Turning; Milling; TIG, MIG-MAG welding; Cutting and folding; Galvanization and powder painting; Delivery and installation. Our products are mostly made of stainless steel and black steel. We can both powder paint and galvanize selected metal products to order, and combine them with other materials (wood, glass, plastic, composite panels, etc.)

Looking for cooperation in the area of: Food production equipment, much different stainless steel products, many different metal design products, individual solutions for construction sites
Technology facilities in company: CNC Laser cutting; CNC plasma cutting; CNC punching (perforating); Sawing; Stamping; CNC Sheet metal bending; Roll bending; Roll forming; Sheet metal bending; Powder coating; Shot blasting; MIG/MAG welding; TIG welding

Turnover in 2023 EUR: 1 138 000

Turnover in 2022 EUR: 352 358

Turnover in 2021 EUR: 371 879

Main markets: United Kingdom;

Latvia; Finland; Estonia

Year of foundation: 2020

Business profile:

- Sheet metal cutting with fibre laser. We work with stainless steel, mild steel, aluminium, with a sheet size up to 3000x1500mm, and thickness up to 20mm.

- Bending of sheet metal parts for medium and large orders up to 3000mm and 1600kN.

- Certified TIG/MIG welders. Welding of various levels of complexity.

- Modern production equipment and strict quality control.

- Equipment known for high quality and accuracy.

- Efficient production system and a team of experienced experts

- Careful processing of each order and recommendations for better result.

- Engineering services.

- Wide network of dependable cooperation partners that are able to provide a full range of metalworking processes

Looking for cooperation in the area of: Business profile

Technology facilities in company: CNC Laser cutting; Sawing; CNC Sheet metal bending; Sheet metal bending; Tube bending; Powder coating; MIG/MAG welding; Shield-metal arc welding; Spotwelding; TIG welding

Certificates in use: EN 1090-1; EN 1090-2

Year of foundation: 2007

LATSTAB is a modern, dynamic Latvian company, whose main commercial activity is to manufacture wide range of steel products for a variety of civil engineering-related areas

Bussines profile:

- street lighting poles (conical, octagonal, tubular, hinged),

- contact line poles for electric mains,

- high masts with mobile crowns, fixed platforms etc.,

- met masts, steel lattice sections (guyed lattice or self-supporting lattice modules),

- steel constructions,

- anchor foundations, pile head plates, base grillages, screw piles for different types of applications

Looking for cooperation in the area of: Highway, road and street construction, railways, renewables, telecommunications

Technology facilities in company: CNC Laser cutting; CNC plasma cutting; Sawing; Cylindrical grinding; CNC milling; CNC turning; Milling; Surface grinding; Turning; Design services CAD; CNC Sheet metal bending; Roll bending; Sheet metal bending; Tube bending; Electrolytic galvanizing; Powder coating; Shot blasting; Wet painting; Chemical composition tests of metal; Non-destructive tests (NDT); MIG/MAG welding; Robot welding

Certificates in use: ISO 9001; ISO 14001; EN 1090; EN 40-5

 France
Year of foundation: 1993

Business profile: CA metalworking company specializing in the design and manufacture of home, garden and catering equipment for smoking and grilling fish, meat, chicken, cheese and vegetables. Our smokehouses are ideal for a variety of locations: garden, terrace, holiday home or camping (easy to build in or stand on a platform). Our developed technology provides excellent temperature and air circulation control, which guarantees the highest quality end result even in the harshest weather. We offer professional but affordable smoking solutions for everyday private use and also for catering. The company developed additional products such as cold smoking equipment and an electric smokehouse

Looking for cooperation in the area of: DIY store chains, Specialized stores, metalworking services

Technology facilities in company: CNC Laser cutting; CNC plasma cutting; CNC Tubular laser cutting; Sawing; CNC Sheet metal bending; Roll bending; Sheet metal bending; Tube bending; Wire bending; Powder coating; Wet painting; MIG/MAG welding; Spotwelding; TIG welding

Certificates in use: EN 1090-1; EN 1090

RELIABLE PARTNER IN ALL ASPECTS OF METALWORKING, CONSTRUCTION AND WAREHOUSING

Business profile: Production of metal structures according to client's sketches; design & innovation, metal furniture & decor, bicycle & bike parts manufacturer, metal constructions for marine & offshore, oil & gas, windmills & crane structure, automotive & agriculture, woodworking machinery, building industry installation of metal and glass construction. Fettling of castings: cleaning, grinding, polishing, welding, heat treatment, shotblasting and CNC machining service for casting; painting & coating, assembling services

Looking for cooperation in the area of: Subcontracting or general contractor – on our factory floor, in the shipyard or on-board, oil & gas platform; manufacturing of steel structures; metal construction; metal processing according to customer drawings; welding services (MIG/MAG, TIG, MMA - ISO 9606-1); plasma cutting; bending; steel straightening and flattening services, assembling, repair, maintenance, renovation, breakdowns services; drilling/pressing; automatic welding; sand blasting; shoot blasting; painting service; provides grinding services towards core intensive castings in small and medium size series, as well as all standard grades of cast iron

Technology facilities in company: Iron casting; CNC gas cutting; CNC plasma cutting; Sawing; Hardening; Cylindrical grinding; Surface grinding; CNC roll bending; CNC Sheet metal bending; CNC tube bending; Roll bending; Sheet metal bending; CNC tube bending; Barrel finishing, tumbling; Polishing, buffing; Shot blasting; Wet painting; Mechanical property tests of metal; Non-destructive tests (NDT); MIG/MAG welding; Robot welding; Shield-metal arc welding; Spotwelding; TIG welding

Certificates in use: ISO 9001; EN 1090-2; Welding Certificate

Main markets: Germany; United Kingdom; USA; Denmark; Finland; Spain; Portugal; Netherlands
Year of foundation: 2005

Business profile: Silkeborg Spaantagning Baltic Ltd. produces and assembles parts of various sizes and shapes in metal, plastic and other manufacturable materials available. We are experts in turning, milling, drilling and welding – dedicated to supply our expertise in these areas. Our constant focus is on quality and continuous improvement
Looking for cooperation in the area of: Our customers represents various industries such as wind power, machine engineering, automotive, construction, energy-efficient solutions, design and others. We will be pleased for new partners of cooperation - both customers and suppliers (metal supply, surface treatments, tools, logistics, etc.). Good and respectful cooperation is valued by us
Technology facilities in company: Sawing; CNC machining centres; CNC milling; CNC turning; Gear making; 3D coordinate measuring (CMM); Non-destructive tests (NDT); MIG/MAG welding; TIG welding
Certificates in use: ISO 9001:2015; ISO 14001:2015; EN 1090-1:2009+A1:2011; ISO 45001:2018; Welding Certificate

Number of employees: 124
Turnover in 2023 EUR: 8 600 000
Turnover in 2022 EUR: 10 400 000
Turnover in 2021 EUR: 7 000 000
Main markets: Germany; United Kingdom; EU; USA; Norway; Sweden; Finland; Austria; Netherlands
Year of foundation: 2010

Business profile: Electrical transformer tanks with conservators, fabrications for Military industry, Production of conveyors for different material handling, enclosures, tanks, mining equipment, coolers for power generators, chassis, car transporter components, agricultural equipment, different other welded steel fabrications. Max. overhead lifting capacity – 30 t
Looking for cooperation in the area of: Welded steel fabrications - MIG/TIG welding, production of equipment against customer drawings, including final assemblies and testing, production of stainless steel structures, drilling, tapping, blasting, painting, assemblies, relatively large in size and weight fabrications/enclosures. Having great experience in Military and Energy industries. Using 3D dimensional scanning for quality control
Technology facilities in company: CNC Laser cutting; CNC punching (perforating); Sawing; CNC milling; CNC turning; Milling; Turning; CNC roll bending; CNC Sheet metal bending; CNC tube bending; Roll bending; Shot blasting; Thermal spraying (metalizing); Wet painting; 3D coordinate measuring (CMM); Non-destructive tests (NDT); MIG/MAG welding; TIG welding
Certificates in use: ISO 9001; OHSAS 18001; ISO 14001; EN ISO 3834-3; ISO 14001:2004; ISO 50000; OHSAS 18001:2007; EN 1090-2+A:2011; ISO 9001:2015; ISO 14001:2015; ISO 50001; EN 1090-1 EXC3; ISO 45001:2018; ISO 50001:2011; ISO/IEC 80079-34:2011 (Directive 2014/34/EU, Annex IV); Welding Certificate; EN1090-2 Exc3; EN ISO 3834-2; ISO45000:2018

WELDED STEEL FABRICATIONS – FULL PRODUCTION CYCLE INHOUSE

CNC Laser cutting

CNC Sheetmetal bending

CNC Milling Sheetmetal rolling

CNC Tube bending Welding

CNC Turning Painting

Assembling Shotblasting

“Build to print” subcontractor in welded steel fabrications for machine building and industrial equipment.

OUR CONTRACTS

- ✓ Military vehicle components
- ✓ Transformer tanks
- ✓ Chassis for mining industries
- ✓ Industrial Mixers
- ✓ Conveyor systems for bulk materials
- ✓ Agriculture equipment
- ✓ Lumber handling equipment
- ✓ Hydraulic tanks
- ✓ Enclosures
- ✓ Coolers for power generators

 Denmark; Baltic states; Scandinavia
Year of foundation: 2010

Business profile: Professional railing, stairs and other structure solutions (using metal, glass, wood) for industrial constructions and civil (private) buildings. We can design, manufacture, paint and install. We also do all different kinds of metal CNC (laser) tube / pipe and sheet cutting machining and post-processing such as CNC bending, classic and laser welding, abrasive blasting, priming and powder coating. Steel structures manufacturing and assembling into client objects. Company provides services as a subcontractor for small and medium volumes to customers that specialize in wide type production fields
Looking for cooperation in the area of: metal machining, processing, constructions and other kinds of cooperation
Technology facilities in company:
 CNC laser cutting:
 - tube (pipe) and different kinds of metal cross-section profiles (L; U; IPE; IPN shapes [H only after blueprints consideration/ analysis], Extruded/ flat bar); An active bevel head that allows cutting at angles of up to 45 degrees to the material;
 - flat sheets (till 20mm thickness);
 CNC sheet metal bending;
 Metal profile sawing;
 Abrasive blasting; priming; powder coating;
 MIG/MAG welding; TIG welding; Laser welding;
Certificates in use: ISO 9001:2015; EN 1090-1:2009+A1:2011; EN 1090-2:2018

Year of foundation: 2012

Business profile: APPLY is an experienced developer of customized Artificial Intelligence (AI) and computer vision solutions. Our solutions successfully perform tasks in various production segments and stands out for a high level of accuracy and high performance. We have successfully implemented more than 50 AI and Computer Vision projects in different industries and production companies

We create:
 - Automated visual quality control systems;
 - Automation solutions for production equipment (including control of robotic devices);
 - Automated production process control systems;
 - Complex internal business computer systems - ERP, CRM, OCR.
 Studying, adapting and implementing Industry 4.0 methods in production plants.

Our deep knowledge on AI computer vision technology gives us possibility to solve totally diverse tasks

We offer:
 - To create accurate, automated, uncompromising quality control systems in production facilities. Both for own products and also for received raw materials;
 - Production process automation solutions;
 - To become the intellectual component for manufacturers and integrators of robotics and industrial automation equipment;
 - The creation of individual, specific internal computer systems for companies (OCR, ERP, CRM), accounting, document flow;
 - Automated determination of product quantities, and other needs
Technology facilities in company: AI and computer vision

WE SET UP and develop manufacturing companies

Monitor ERP

Manage production processes, keep everything in **ONE PLACE**

- More than 40 years of experience;
- More than 4000 cutstomers;
- 100% for manufacturing companies;
- Simple and quick installation with a user-friendly working environment.

MANUFACTURING

The manufacturing module contains everything you need to control, plan, and follow-up on production.

- BOM and Routing with BOM lists and operation lists
- Pre-calculations and post-calculations
- Manufacturing order - register/release suggestions, order documents, replan
- Loading plans in lists and charts
- Pick lists for picking of material
- Operation and material reporting
- Manage subcontracts - orders, shipment, arrival reporting, planning
- Pool planning for efficient use of equivalent machines
- Manufacturing follow-up - efficiency, productivity, use of resources

STOCK

The Stock module contains functionality for stock control, material control, and stock count.

- Part register - create parts and part lists
- Requirements planning - material control via e.g. requirement calculation and net requirement calculation
- Procedures for stock count of individual parts or large range of parts (also continuous stock count)
- Stock location register with functions for stock location control
- Stock value list, WIP value
- Product register - serial numbers, batch numbers, traceability, certificate
- Case management - quality nonconformities from customer or internal

PURCHASE

The Purchase module contains support for the entire purchase process, from inquiry to accounts payable.

- Supplier register with SRM functionality
- Inquiry - register, send, monitor
- Purchase order - register/release suggestions, send, monitor
- Arrivals, print transport labels, receiving inspection
- Register supplier invoices, link to purchase order
- Accounts payable with payment of supplier invoices, file transfer
- Follow up using e.g. purchase statistics, supplier rating, and order backlog
- BI - Purchase

TIME RECORDING

The Time recording is the module closest to the shop floor. The hub of the Time recording is the recording terminal where personnel record time for both attendance and work.

- Personnel records with settings for attendance and work
- Recording terminal where the personnel record attendance and work, available in both the Windows client and web client
- Authorize and adjust records
- Work schedules and schedule cycles
- Salary basis
- Follow-up of e.g. productivity, attendance/absence, indirect time

SALES

The Sales module contains all functionality regarding customers and sales, from quote to accounts receivable.

- Customer register with CRM functionality
- Quotes - register, send, monitor, convert into actual orders
- Customer orders - register, check delivery times, confirm, monitor
- Delivery process with pick lists and transport management
- Invoices to customer, pro forma, invoicing plans
- Accounts receivable with functions for payments in, payment reminders, interest invoices, etc.
- Follow up using e.g. sales statistics, delivery reliability, order inflow, cash flow forecast
- BI - Sales

ACCOUNTING

The Accounting module manages the company's current accounting and follow-ups.

- Chart of accounts with cost centers and cost units
- Accrual accounting and automatic posting
- Voucher registration, integration with accounts receivable and accounts payable
- VAT reports
- Accounting reports with standard reports for balance and income statement, and ability to build customized reports
- Budgets and forecasts
- Project accounting and integration with other modules

To our ByCut Smart 3015, all that matters is sheet metal-making cutting effortless for you.

Your best choice for raising performance.

bystronic.com

Save production space up to 90% and increase picking speed with automatic vertical strage lifts!

Outstanding ergonomics, reliable operation, quick ROI - return of investment.

TehnoBuss

MASOC has been implementing the TehnoBuss project since September 2015, with the aim of generating interest in engineering sciences in school youth and informing them of opportunities for learning, study and career development in the industry.

TehnoBuss is a mobile demonstration laboratory built on the bus platform, which is equipped with modern, full-function technological stands, equipment and tables for automated processing of various materials, which school youth can not only look at during classes, but also try themselves.

TehnoBuss focuses on the enhanced promotion of co-operation between educational institutions, employers and young people, this is why we call for the cooperation of educational institutions, and other stakeholders who support and are interested in promoting the interest of young people about education and professional career path in engineering.

Ar mērķi radīt skolu jaunatnē interesi par inženierzinātnēm, informēt tos par mācību, studiju un karjeras iespējām nozarē, MASOC jau kopš 2015. gada septembra īsteno projektu TehnoBuss.

TehnoBuss ir uz autobusa platformas izveidota mobila demonstrāciju laboratorija, kura ir aprīkota ar mūsdienīgiem, pilnas funkcionalitātes tehnoloģiskajiem stendiem, iekārtām un dažādu materiālu automatizētas apstrādes darba galdiem, kurus skolu jaunieši nodarbību laikā var ne vien aplūkot, bet arī paši izmēģināt.

TehnoBussa darbība ir vērsta uz ciešākas sadarbības veicināšanu starp izglītības iestādēm, darba devējiem un jauniešiem, tādēļ aicinām uz sadarbību mācību iestādes un citus interesentus, kuri atbalsta un ir ieinteresēti veicināt jauniešu interesi par izglītību un profesionālo karjeras ceļu inženierzinātnēs.

Liepāja Industrial Park - the most profitable place for your investments

Transformation of the former ferrous metallurgy plant "Liepājas Metalurģis" into a modern industrial park.

The Liepāja Industrial Park is a modern and innovative business site located in the territory of the Liepāja Special Economic Zone. It is a place for modern production facilities, science and research, logistics centers and development of energy-intensive projects. The development area of 120 ha is divided into separate land plots with construction possibilities and accessible engineering communications.

- ONE-STOP-SHOP AGENCY**
- BUSINESS DEVELOPMENT
- LAND AND PREMISES
- TAX INCENTIVES**
- INDUSTRIAL TRADITIONS**
- AVAILABLE SKILLED WORKFORCE**
- AIR, LAND, SEA AND RAIL CONNECTIONS**

The Liepāja Special Economic Zone is a unified economic ecosystem established by law to promote the development of the seaport, industrial manufacturing, and the airport, to provide business infrastructure and to create a favorable overall business environment. The Liepāja Special Economic Zone has been a successful support business tool for more than 25 years.

Sustainable thinking has been embedded in the "genetic code" of the Liepāja Industrial Park, clearly stating the basic principles of education, innovation and circular economy.

SCIENCE, RESEARCH, INTEGRATED SOLUTIONS
- GREEN**
CLIMATE NEUTRAL

"In the last seven years, 24 new factories have been built in Liepāja, additionally providing 125.6 thousand m² of production space. An important turning point was the investments made by the municipality in the industrial area of Meldru Street and that of the Karosta Industrial Park, to arrange the sites and the engineering communications. And it has paid off. Two Danish capital "Jensen Metal" companies are already operating in the Karosta Industrial Park, as well as the Swedish-British joint venture company "Interspiro", the "Golden Fields Factory LV" company is about to start its operation in the nearest future, while the Swedish capital company "Lesjofors Springs LV" is already successfully running business at Meldru Street.

We now see that Karosta, where the Soviet military settled for decades, leaving a degraded area behind them, has turned into a place where modern manufacturing companies with well-paid jobs are running business. We need to take a step further and develop the territory of the former factory "Liepājas Metalurģis". We want to continue what we have already started and attract large, global manufacturers with serious technologies. What was done in Karosta should also be done here. We have started the development of the vast territory by building utilities, streets with sidewalks, bicycle paths, lighting, green recreation areas. Liepāja is a small city with a global scope, this is a place where people who want to move forward and are not afraid of challenges live, study and work. We have created a modern and friendly business environment, and we warmly invite new ones to join the already existing production companies."

ULDIS HMIELEVSKIS
Liepāja SEZ CEO

Located in Northern Europe, with access to consumers in the EU and the CIS, Latvia boasts a premium class infrastructure and connectivity, a lenient tax regime and competitive business costs.

LIAA: A ONE-STOP-SHOP FOR FOREIGN INVESTORS AND BUYERS

Considering or starting a business in Latvia? Then, the Investment and Development Agency of Latvia (LIAA) will be your first point of contact and a one-stop shop to create your success story.

WHAT DO WE OFFER?

Investment Facilitation

- Information on business opportunities, investment incentives and the best real estate options
- New contacts to start a business
- Legal assistance with start-up procedures

Suppliers' Searches

- Information on Latvian exporting companies, products and services, search of suppliers
- Reaching out to Latvian companies, introducing to your business proposal
- Seminars and trade missions to/from Latvia

Information on foreign markets for enterprises in Latvia

- Assistance at fairs and trade missions, export promotion campaigns and B2B matchmaking
- Data on workforce availability and skill evaluation

State Support Programmes

- A wide range of support programmes to start and grow your business
- Information on the EU common market, policies, legislation, regulations and trading systems

Foreign representatives

- Offices in 20 countries provide information on all you need to know about business in Latvia

SKF®

Uzticama kustība ar SKF!

VARNSDORF TOS

TOS VARNSDORF with the headquarters in Varnsdorf, Czech Republic, is a leading global supplier of complete machining technologies and a producer of machine tools that are designed and manufactured with precision and a professional approach. Our product range includes a wide range of horizontal machining centres, horizontal boring mills, portal machining centers and knee-type milling machine.

- **READY FOR INDUSTRY 4.0**
- **MACHINING FROM SIZE OF PARTS FROM 1 M³**
- **MANUFACTURING ACCURACY LEVEL IN HUNDREDTHS OF MM**
- **SOLUTION FOR AUTOMATIZED PRODUCTION**
- **REMOTE MACHINE DIAGNOSTICS AND SETUP**
