

Latvian Metal Industry **2017**

MAIN PRODUCTS

Manufacture of basic metals – non-ferrous metal alloy ingots, cast iron and non-ferrous details.

Shipbuilding and repair.

Railway transport technologies. Manufacture and repair of electrical and diesel engine trains and trams.

Manufacture of buses, trailers and semi-trailers. Parts and components for automotive industry.

Agricultural machinery, tractor-trailers, hay-spreaders, mowers, milking equipment etc.

Machinery and equipment – vacuum coating equipment, hydraulic loaders, cylinders, rotators, lubrication stations, brakes, driving chains etc.

District heating systems, solutions for renewable energy, cogeneration projects.

Equipment and machinery for woodworking, food processing, chemical and pharmaceutical industry.

Equipment and machinery for ports, nonstandard equipment, conveyer systems.

Electrical equipment.

Design, manufacture and assembling of steel structures for construction.

Parts and components for subcontracting. Full range of metal processing services.

ASSOCIATION OF MECHANICAL ENGINEERING AND METALWORKING INDUSTRIES OF LATVIA

MASOC (Association of Mechanical Engineering and Metalworking Industries of Latvia) was established in 1994 as an informative and consultative centre for mechanical engineering industry. Our mission is to represent the interests of our member companies, initiate and implement joint projects and activities with the main objective of developing international competitiveness of the member companies and sector in general.

MEMBERS

Today MASOC unites over 150 leading companies specialised in various branches of metal processing and mechanical engineering. Member companies produce about 80% of the sector output. Besides manufacturing companies, service providers and related companies are also among the members, covering the whole value creation chain. Close co-operation is ensured with professional and higher education establishments, research institutes and municipalities.

ACTIVITIES

The main activities of the association include:

- Representation of members' interests at national and international level
- Networking and development of commercial collaboration among members
- Maintaining of the database on technological capabilities and competences of the member companies
- Marketing, internationalisation and export promotion activities
- Co-operation with education and research institutions
- Further education and skills development projects
- International co-operation with similar organisations in other countries.

MASOC is member of European sector organisations ORGALIME and CEEMET.

ASSOCIATION OF MECHANICAL ENGINEERING AND METALWORKING INDUSTRIES OF LATVIA

MAIN PRODUCTS

The main products and services offered by our companies include:

- Shipbuilding and repair
- Manufacture and repair of railway rolling stock
- Manufacture of basic metals – steel bars, iron and non-ferrous alloys
- Welded steel structures for construction
- Heating systems, solutions for renewable energy, cogeneration projects
- Equipment and machinery for ports, agriculture, food processing, woodworking, forestry and wide range of other industries
- Electrical equipment and machinery
- Wide range of technological equipment – vacuum coating equipment, hydraulic loaders, cylinders, rotators, lubrication stations, brakes, driving chains, etc.
- Semi-finished goods and subcontracting services in metal processing.

SUBCONTRACTING

Many of the companies in the sector are involved in subcontracting activities. Altogether the member companies cover the whole spectrum of metal processing technologies making it possible to produce parts and components of any level of complexity. MASOC constantly maintains a database of technological capabilities of the member companies making it possible to find the right supplier both for local and foreign partners.

WE OFFER:

- Information about technological capabilities and competences of the companies
- Assistance in finding suppliers and cooperation partners
- Effective subcontracting network covering the whole range of metal processing technologies
- Single contact point for enquiries.

Director: Andrejs Šveisbergs
Chairman of the board mob. ph: +371 29214144
Contact person: Andrejs Šveisbergs
Position: Chairman of the board
Languages: Latvian, Russian, English
Number of employees: 3
Year of foundation: 2010
Turnover in 2014 EUR: 90 000
Turnover in 2015 EUR: 113 000
Turnover in 2016 EUR: 127 000

Main markets: Lithuania, Estonia, Latvia
Business profile: Manufacturing and restoration of polyurethane rubber products
Looking for cooperation in the area of: Delivery and restoration of polyurethane products
Technology facilities in company: Soldering, Turning, Cylindrical grinding, Polyurethane casting machine, Sheet metal bending

NACE 24 — Manufacture of basic metals

3

A HOLDING
Legal form: JSC.
Reg.No.: 40003326131
Address: Bērzaunes iela 8 A,
 Rīga, LV-1039
Phone: +371 67545007
Fax: +371 67816083
E-mail: info@a-holding.eu
WEB site: www.a-holding.eu

Member of the board: Sergejs Zaicevs
Contact person: Andrejs Morohins
Position: CEO
Languages: Latvian, Russian, English, German
Number of employees: 50
Year of foundation: 1997
Turnover in 2014 EUR: 15 164 707
Turnover in 2015 EUR: 10 043 199
Turnover in 2016 EUR: 8 758 654
Main markets: EU, Germany

Business profile: Manufacturing of Secondary Alloys in ingots. Processing and trading of non-ferrous and ferrous metals scrap. Utilization of hazardous waste: electrical and electronic equipment (WEEE); used batteries, galvanic cells, luminous tubes etc.; old cars; medical waste. Management of segregated wastes (plastic, rubber, PET, used tyres, glass, wood, paper etc.) and packing materials.
Looking for cooperation in the area of: Cooperation in main business profile. Purchasing of aluminium ingots. Establishment of WEEE recycling plant. Investments to our business aluminium ingots. Establishment of WEEE recycling plant. Investments to our business
Certificates in use: ISO 14001, ISO 9001, OHSAS 18001
Technology facilities in company: Casting of non-ferrous metal ingots

Managing director:

Artūrs Verkevičs

Contact person: Lana Strazdiņa

Position: Sales and Logistics
Manager

Languages: Latvian, English,
Russian, Norwegian

Number of employees: 65

Year of foundation: 2002

Main markets: Norway, Sweden,
Finland

Business profile: Nodular and grey iron castings
for various applications. Casting weight up to 100
kg. Machining of raw castings and surface
treatment. Sand-based machine moulding line
+GF+ with flask size 600x700x300/300. Annual
capacity 3500 tons. The strength of the foundry
consists of efficiency and flexibility based on small
and medium sized series. Our pattern shop offer
prototyping, competitive models based on 3D
technology and skilled craftsmanship.

Looking for cooperation in the area of:

 Manufacturing of nodular and grey iron castings
for various applications

Certificates in use: ISO 9001, ISO 14001, OHSAS
18001, ISO 50001 certified. Approved Manufacturer
by Lloyd's Register, ABS and DNV GL

Technology facilities in company: Iron casting,
Shot blasting, Heat treatment, Surface grinding,
Machining, Wet painting, Design of stamps,
Production of stamps, 3D coordinate measuring
(CMM), Mechanical property tests, Chemical
property tests, Non-destructive tests, Ultrasonic
tests, Design services CAD

NACE 25 — Manufacture of metal products

AISIS
Legal form: Ltd.

Position: Member of the board

Languages: Latvian, English,
Russian

Number of employees: 75

Year of foundation: 2005

Turnover in 2014 EUR: 3 100 000

Turnover in 2015 EUR: 3 352 839

Turnover in 2016 EUR: 2 500 000

Main markets: European Union,
Norway, CIS

Business profile: The company's main areas of
production include the manufacture of stainless
steel tanks with the capacity of up to 250 000 liters
and a range of processing equipment for food,
chemical and pharmaceutical industries designed
on the basis of such vessels. Other non-standard
stainless steel equipment are also manufactured.

Production groups: tanks for the reception,
gathering, production and storage of milk, beer,
drinks and other products; process vessels with
and without coating, with blending devices of
various types; CIP (Clean In Place) washing
systems; heat exchangers, fermentation tanks.
AISIS Ltd. can arrange the assembly and
installation of the equipment with complex
deployment according to the design.

Looking for cooperation in the area of:

 Searching business cooperation with engineering
company

Certificates in use: OHSAS 18001, ISO 9001, ISO
14001, ISO 3834-2

Technology facilities in company: Stainless steel,
shearing, CNC laser cutting, Sawing, Polishing,
buffing, Surface grinding, Cylindrical grinding,
Sheet metal bending, CNC sheet metal bending,
Roll bending, CNC roll bending, Cone bending,
Shield-metalarc welding, MIG/MAG welding, TIG
welding, Spot welding, Robot welding, Laser
welding, Automatic surface grinding

Lithuania, Norway, England**Business profile:** CNC SAAN specializes in CNC turning and milling operational segments.

Currently company is rapidly developing and looking for new business partners. The company was established by professionals, who have gained experience in international manufacturing sector and are able to provide high quality solutions for its customers. At the moment company provides services as a subcontractor to customers, that specialize in production or equipment for Automotive, Energetic, Agriculture, Oil and Gas, Railway, Wind energy industry. Manufacturing centers of the Company consists of 13 CNC machine units, where maximum machining parameters are: milling (horizontal and vertical) - max 6000 x 1260 x 1750mm, turning (using active tool) - max D 350 x 1000 mm.

Looking for cooperation in the area of:

Company is looking for partners in various industry sectors to cooperate in CNC machining

Certificates in use: ISO 9001:2009**Technology facilities in company:** CNC turning, CNC milling, CNC machining centres, Sawing, Milling, Turning, Gear making, Heavy duty milling

Business profile: We are steel products
 manufacturer producing parts and assemblies. The
 focus of the company is on punching, turning,
 welding and milling parts from simple to complex
 and precise components, sub-assemblies and final
 products made of steel, stainless steel, cooper,
 aluminum and plastics for different industries incl.
 electronical, off-shore, mechanical engineering,
 food production, woodworking, construction and
 other
Looking for cooperation in the area of: Business
 profile
Technology facilities in company: Sharpening,
 CNC punching (perforating), Sawing, CNC milling,
 CNC turning, Milling, Turning, MIG/MAG welding,
 Spotwelding, TIG welding, Sheet metal bending,
 Roll bending

Looking for cooperation in the area of: Design and production of advertisement and information signs. Laser cutting
Certificates in use: ISO 9001:2008, EN 1090-1, ISO 14001:2005
Technology facilities in company: CNC turning, CNC milling, Sawing, MIG/MAG welding, TIG welding, CNC machining centres

Steel Fabrication Manufacturer

WELDED STEEL STRUCTURES

"Build to print" sub-contractor in welded steel structures, surface treatments & final assembly.

SFM offer a full cycle production, from its modern HQ / production facility based in Jelgava, Latvia.

OUR CONTRACTS

- ✓ Chassis for mining industries
- ✓ Tow truck installations - lifts, platforms, installations
- ✓ Coolers for power generators
- ✓ Industrial Mixers
- ✓ Conveyor systems for bulk materials
- ✓ Pressure vessels and storage tanks
- ✓ Car transporter components

APPROVALS IN USE

- ✓ ISO9001: 2008
- ✓ EN1090-2 Exc 2
- ✓ EN287-2
- ✓ ISO14001
- ✓ OHSAS18001

Year of foundation: 2000

Turnover in 2014 EUR: 9 000 000

Turnover in 2015 EUR: 8 700 000

Turnover in 2016 EUR: 12 000 000

Main markets: Lithuania, Estonia, Latvia, Finland, Sweden

Business profile: Welded steel structures with precise working. Contractor for design and manufacturing of conveyors, shutters, hoppers, platforms, and different other machine components as well as non-standard equipment and production lines. Contractor for designing, manufacturing and installation of log feeding and grading lines as well as different other handling equipment and lines for woodworking industry. Production of big size components. Manufacturing of high accuracy turning parts, shafts, axis with milling operations in one setting on nowadays equipment

Looking for cooperation in the area of:

Manufacturing of material handling equipment for wood and mining industry. Turnkey projects for log handling and grading as well as by product handling machinery for wood industry. CNC working services

Certificates in use: EN 1090-1, OHSAS 18001:2007, ISO 3834-2 : 2006, ISO 9001

Technology facilities in company: Shot blasting, Hardening, Sheet metal bending, CNC Sheet metal bending, TIG welding, MIG/MAG welding, Gear making, Turning, Surface grinding, Milling, CNC turning, CNC milling, CNC machining centres, Sawing, Shearing, CNC plasma cutting, CNC gas cutting, Wire harnesses, Design services CAD, Sharpening, Wet painting

Year of foundation: 1999

Main markets: Germany, Latvia

Business profile: The company works in the field
of industrial automation and machine design.

Using modern 3D CAD technologies our highly
skilled designers can propose high quality and
favorable decisions in the automation, machine
and tool design. Our services for clients: Consulting;
Innovation 2D and 3D designing; FEM analyzing;
Prototype design and manufacturing; Intermediary
in accommodation of manufacturing and design
support of manufacturing and assembly works;
Designing of details and assembly units under your
sketches; Digitalization from your archives in the
form of 3D models and 2D drawings. Our field of
activity: mechanical engineering/ engineering of
special mashines, plant construction/assembling
technics, special purpose washer plants, agricultural
machinery, industrial automation, equipment
construction, rig building, assembly construction
