LATVIAN ENGINEERING INDUSTRY AT TECH INDUSTRY 2025

November 27-29, 2025

**ASSOCIATION OF MECHANICAL ENGINEERING
AND METALWORKING INDUSTRIES OF LATVIA**

Brīvības gatve 223, Rīga, Latvia, LV-1039 | Reg. No. 40008017857
+371 67554825 | masoc@masoc.lv | www.masoc.lv

**GATEWAY TO THE ENGINEERING INDUSTRY OF LATVIA
INFORMATION ABOUT SECTOR'S SUB-CONTRACTING AND TECHNOLOGICAL FACILITIES
PARTNER SEARCH**

Association of Mechanical Engineering and Metalworking Industries of Latvia was established in 1994 as an informative and consultative centre for mechanical engineering industry.

MASOC mission is to represent the interests of member companies, initiate and implement joint projects and activities with the main objective of developing international competitiveness of the sector.

Today Association unites more than 170 leading companies specialised in various branches of metal processing and mechanical engineering. Besides manufacturing companies, service providers and related companies are also among the members. Close cooperation is ensured with professional and higher education establishments, research institutes and municipalities.

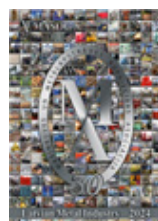

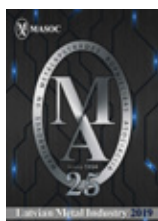

THE MAIN ACTIVITIES OF THE ASSOCIATION INCLUDE:

- Representation of members' interests at national and international level
- Networking and development of commercial collaboration among members
- Maintaining of the database on technological capabilities and competences of the member companies
- Marketing, internationalisation and export promotion activities
- Co-operation with education and research institutions
- Further education and skills development projects
- International co-operation with similar organisations in other countries.
- Digitalisation projects, partnership with EDIH network
- Support for innovation and development of new products and technologies within Mechanical Engineering Competence Centre
- Promotion of STEM and technical education among young people

WE OFFER:

- Information about technological capabilities and competences of the companies
- Assistance in finding suppliers and cooperation partners
- Effective subcontracting network covering the whole range of metal processing technologies
- Single contact point for enquiries

TECH INDUSTRY is the biggest mechanical engineering, metalworking, automation, electronics, and new tech three-day fair and business-innovation forum in the Baltics, bringing together more than 250 companies from at least 18 countries every year.

CO-ORGANIZED BY the MASOC, Latvian Investment and Development Agency, BT1 International Expo Company, Enterprise Europe Network (EEN) Latvia.

MAIN EVENTS DURING EXHIBITION

27 NOVEMBER

Official opening ceremony of Tech Industry 2025

13:00-13:30 Kipsala Exhibition Centre, Hall 2

27 NOVEMBER B2B matchmaking event

11:00-16:30 Kipsala Exhibition Centre, Hall 1 Balcony

28 NOVEMBER B2B matchmaking event

10:30-16:30 Kipsala Exhibition Centre, Hall 1 Balcony

Detailed information about all thematic events and participants You can find: www.techindustry.lv

LATVIAN MECHANICAL ENGINEERING MANUFACTURERS at Tech Industry 2025

AB METAL
www.metal.lv

Stand LV-35
(Hall 1)

Small and flexible family company involved in precise metal working, mostly operating as sub-contractor who is specialized in SHEET METAL PROCESSING and MACHINING by producing from simple to complex and precise components, sub-assemblies and final products made of steel, stainless steel, aluminium and other materials for different industries incl. OFF-SHORE, FOOD, WOODWORKING, MECHANICAL ENGINEERING, CONSTRUCTION and other industries. We are able to carry out very small as well as large scale (up to 6700x3600x2000mm) projects by using CNC Laser cutting, CNC water jet cutting, CNC sheet metal bending, CNC roll bending, CNC tube bending, NC shearing, NC sawing, CNC turning, CNC 9-axis multi-functional turning and CNC milling machine-tools.

Arnis Balodis

+371 26520970

info@metal.lv

ADK
www.adk.lv

Stand LV-21
(Hall 1)

ADK is the largest converter of abrasive products in the Northern Europe with 29 year experience in the market. Represents major manufacturers – 3M (USA), VSM (Germany), Deerfos (South Korea). Various standard and non-standard abrasive belts, discs and cylinders produced in Latvia for local and global metalworking industry. Distributes 3M personal protective equipment for metalworking workers – welding, breathing, vision, hearing, body protection. Industrial belt grinding machine Nord Grinders® manufacturer.

Toms Ansens

+371 26128701

AERONES ENGINEERING
www.aerones.com

Stand LV-3
(Hall 2)

Aerones is the global leader in robotic wind turbine inspection, maintenance, and AI-driven solutions, delivering faster, safer and more effective services with patented robotics technology.

Valdis Ilguns

+371 29284379

valdis.ilguns@aerones.com

The innovations that Aerones deliver to the wind industry promote intelligent predictive maintenance of wind turbine blades and towers, helping to maximise efficiency of wind assets and lower operating costs.

Aerones customers represent over 50 percent of the global wind power capacity, including leading operators such as NextEra, GE, Vestas, Enel and Siemens Gamesa.

Valts Jakubovičs

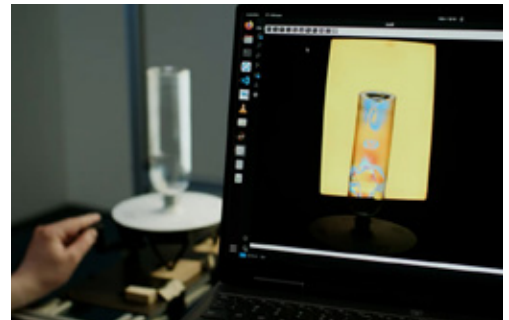

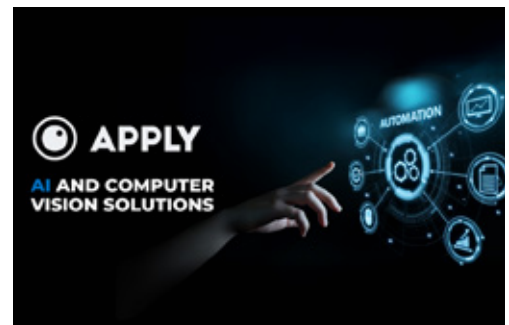

+371 26135853

valts.jakubovics@applyit.lv

APPLY is an experienced developer of customized Artificial Intelligence (AI) and computer vision solutions. We use the latest AI and computer vision innovations to help businesses grow and solve complex challenges more efficiently.

Services & Expertise:

- Automation of manufacturing processes;
- Automated visual quality control systems customized for diverse industries (industrial manufacturing, retail, healthcare, logistics);
- Robotics, Mechatronics and Prototyping – we add an intellectual component to existing manufacturing equipment, providing full-cycle robotics and mechatronics services. Intelligent and autonomous devices by combining programmable controllers, sensors, and mechanical systems;
- Custom solutions for Optics and Microscopy. Automated sample detection, object classification and data interpretation by combining innovative optics with AI computer vision;
- AI consulting on AI solutions and implementation, delivering business case analysis. Providing workshops and trainings to empower your teams with practical AI knowledge.

BALTMA

Alvis Sokolovs

+371 29266503

alvis.sokolovs@baltma.lv

Since 2005, we have demonstrated our expertise in Swiss Type turning, providing services to clients in Central and Northern Europe.

Today, in addition to CNC Swiss Type turning, our range of services includes, CNC Turning, CNC Milling, part processing, assembly of mechanical units, technical drawing preparation, and prototyping across various materials.

Salvis Pīlups

+371 26555009

salvis@cncsaan.lv

CNC SAAN's core business is CNC machining services. The company was founded in 2012 and offers a wide range of turning and milling operations including 5-axis turning and milling as well as heavy-duty machining.

According to customer drawings the company produces components of various specifications and is able to provide a full cycle of part production including services such as heat treatment, surface treatment, assembly, welding and painting in cooperation with our company's outsourcing partners.

We focus on small and medium series production, and the company's equipment is suitable for the production of medium and large-sized parts. Company have 23 different CNC machining centers. Our main industries are industrial equipment, agriculture, marine, processing equipment, offshore and energy industry, mining and defense industry.

Jūrgis Vašuks

+371 22187993

jurgis.vasuks@compor.lv

COMPOR manufactures profiles and constructions from fiberglass composite. It is a durable, versatile material that is also suitable for use in aggressive environments: bridges, ports, roads, railways, industry, energy and hydraulic structures.

Main products – profiles are produced by pultrusion process. A profile of a certain shape is made by pulling through a heated form glass materials impregnated with thermosetting resins. The end product contains up to 70% fiberglass filler and does not require additional processing. Additionally, the length of the profile is not limited and is usually depends upon customer's needs as well as transport options.

Aleksandrs Meņščikovs

+371 20254004

a.menscikovs@cwtechnics.lv

CW Technics is a production company specializing in engineering, manufacturing, and installation of complex equipment made from stainless steel, duplex, super duplex, titanium, and nickel alloys.

Our expertise covers pipe systems, pressure vessels, storage and process tanks, reactors, heat exchangers, boilers, scrubbers, mixers, bunkers, and other custom-designed equipment.

DESIGN TREE

www.designtree.lv

Stand LV-20

(Hall 1)

DESIGN TREE
Mechanical Engineering

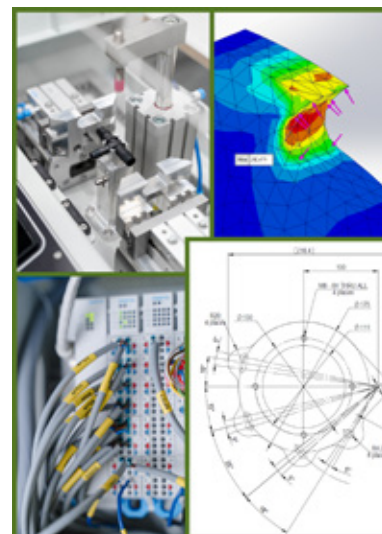

Design Tree is an engineering company specializing in the design and manufacturing of equipment and machinery for industrial companies. The company's main focus is on custom production equipment tailored to specific customer needs – ranging from individual machines to complete production lines.

The company covers the entire development cycle – from idea and concept design to detailed engineering, prototyping, final production, and equipment commissioning.

ECOHEAT TECHNOLOGIES

www.ecoheatholdings.lv

Stand LV-34

(Hall 1)

ECOHEAT
TECHNOLOGIES

Company specializing in the design, manufacturing, and installation of biomass boilers, modular boiler houses and biomass heating systems. Based in Jelgava, the company offers turnkey solutions for central heating and industrial applications across Europe, utilizing renewable energy sources such as woodchips, bark, pellets, and waste-derived fuels. The company also provides steel subcontracting services for various industrial applications. Since 2025, the company has also been manufacturing cast iron components and mechanical parts at its Liepāja facility, offering products such as hydraulic cylinders, castings for water supply and sewage systems, as well as for machinery manufacturing.

Mārtiņš Vītols

www.emjmetals.lv

Stand B-1

(Hall 2)

EMJMETĀLS

Agris Punculs

+371 26661153

agris@emjmetals.lv

Subcontractor of sheet metal cutting, bending services. Final product-prefabricated sheet metal parts made on customer order. Additional services (welding, surface treatment, machining) upon request and availability. For defence industry full production cycle according standards (cutting, bending, welding, painting). Including ballistic steel structures. Laser cutting- with table layouts up to 8150*2600 mm with bevel cut, drilling and threading option. Bending- up to 8000,- mm with 1000,- ton power. Plasma cutting- table layout up to 4000*20000,- mm

ENERGOFIRMA JAUDA

www.jauda.com

Stand LV-14

(Hall 1)

Sanda Zeimale

+371 22053499

sanda.zeimale@jauda.com

Energofirma "JAUDA" was established in 1961. Nowadays it is one of the largest producers of electrical equipment in the Baltic States. Since the beginning JAUDA has produced products for energetics and electrification including compact transformer substations, low/medium voltage equipment and steel constructions.

Jauda offer control cabinets, enclosures, electric line elements, towers, masts and subcontracting of metalworking services - punching, bending, panel bending, laser/gas cutting, powder coating, mechanical/electrical assembly.

ENERGOLUKSS

www.energolukss.lv

Stand LV-274

(Hall 1)

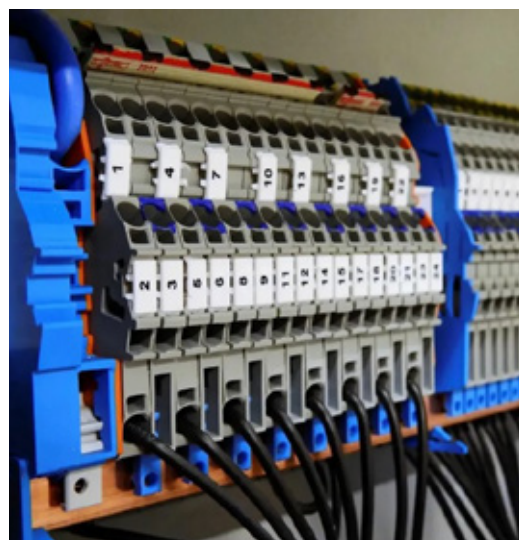

Mīkēlis Caunītis

+371 67542223

mikelis@energolukss.lv

Energolukss is the leading full-service supplier of energy-efficient and sustainable backup and guaranteed power supply solutions in Latvia since 1997 – generators, UPS, batteries, charging equipment for electric cars, solar energy, wiring components and others.

EXIGUM

www.exigum.com

Stand LV-4
(Hall 1)

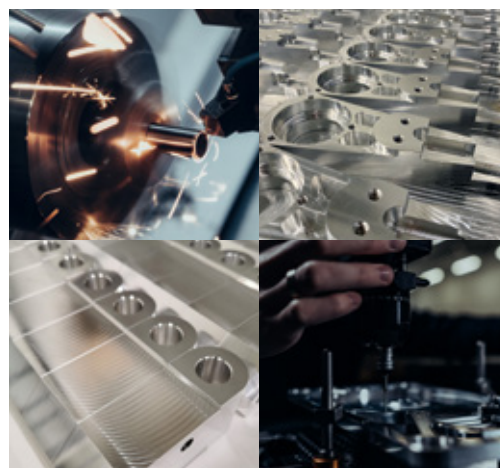

Kārlis Krūmiņš

+371 26577981

karlis.krumins@exigum.com

At EXIGUM, we excel in delivering high-precision CNC machining solutions tailored to meet the exacting demands of modern industries. With our equipment and a team of skilled engineers, we are partners in turning complex designs into reality.

Able to produce high-complexity parts starting from prototypes to high-volume batches. Produced part dimensions from 20mm to 1000mm in dimensions for all operations.

FILTRI

www.filtri.lv

Stand LV-31
(Hall 1)

Lienīte Bite

+371 29165330

lienite@filtri.lv

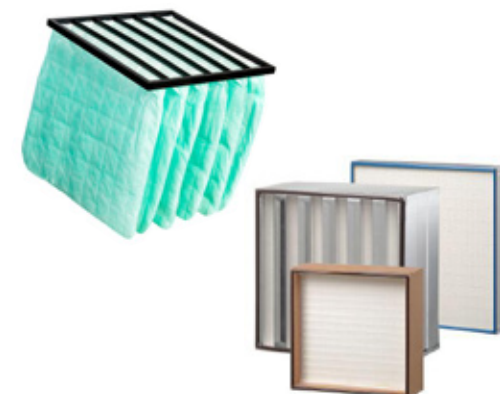

SIA "FILTRI" is the leading locally-owned manufacturer of air filters in Latvia, backed by over 20 years of industry expertise. Since 2009, our operations have been certified in accordance with the ISO 9001:2015 quality management standard — a reflection of our commitment to continuous improvement, technical excellence, and long-term reliability.

We specialize in the production of high-performance air filters for ventilation and dust extraction systems. Our solutions help improve indoor and environmental air quality, reduce energy consumption, enhance working conditions, and extend the service life of HVAC and filtration systems.

Our product range includes:

Pocket filters; Panel filters; Compact filters; HEPA filters; Activated carbon filters; Filter cartridges; Bag filters; Filter media and more.

We welcome collaboration with industrial clients, distributors, system integrators, HVAC service providers across Europe and beyond.

FONONS

Production of Industrial oil screw compressor with remote control, oil free water lubricated screw compressor, oil free screw blowers

- Design of compressor, water pump and air blower systems for customer needs;
- Industrial equipment remote monitoring and control systems;
- Assembly of compressed air systems;
- Installation of water pumps and air blower systems;
- Monitoring, repair and replacement of industrial equipment.

GOODSTEEL

Artis Miklavs

+371 29429734

info@goodsteel.lv

- Various types of metal structures and other products;
- Design and interior items;
- Industrial food production equipment;
- Design and construction;
- Delivery and installation of manufactured products.

We offer different types of metal processing:

- Welding with TIG, MIG-MAG;
- Cutting parts, bending;
- Painting, hot dip galvanizing;
- CNC milling and turning.

Ingus Sudmalis

+371 29182104

ingus@icsbaltic.lv

A metal surface treatment and coating company in Latvia specializing in various surface treatment services.

We offer the following services:

- Electro galvanization
- Aluminium anodizing
- Electrochemical polishing for stainless steel
- Black oxidation
- Plasma electrolytic oxidation
- Stainless steel pickling.

KERAMSERVISS

Irina Ježova

+371 26137928

irina@keramserviss.lv

Our Products and Services:

- Refractory installation, repair, and supply of consumables for industrial boilers;
- Design, manufacturing, and maintenance of heat treatment kilns, including spare parts;
- Production and repair of wire heating elements and thermocouples;
- Manufacturing of main control boxes – universal systems for measurement and automation;
- Production of preformed refractory castable shapes;
- Heat treatment of metal parts and structures, including annealing and hardening;
- Design and manufacturing of non-standard heat treatment equipment, tailored to specific customer requirements.

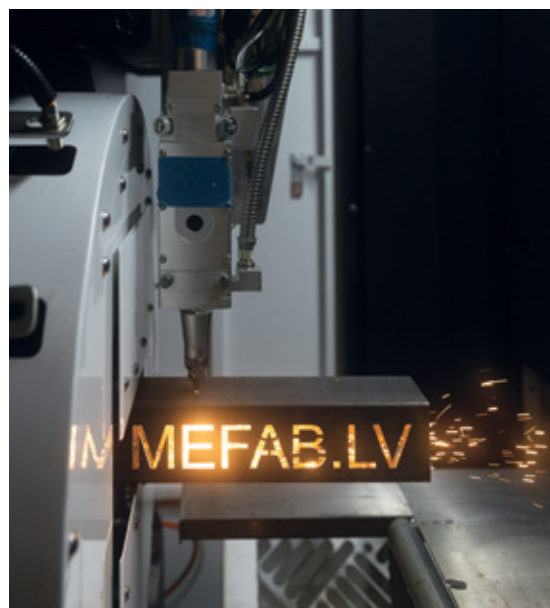

Specializes in providing high-quality metal fabrication solutions, tailored to meet unique needs of our clients.

Services:

- Tube laser;
- Metal sheet laser;
- Bending; Rolling;
- Welding, TIG / MIG / Laser weld /
- Spot welding / Robotwelding;
- Press threading / Stud welding;
- Mechanical processing;
- Powdercoating;
- Prototypes;
- Assembly (Combining different materials);
- Delivery

Liene Gaspažiņa

+371 29618115

liene@silmor.eu

SILMOR is a manufacturer of industrial components and marking products. Company offers a wide range of products and services, including membrane keyboards, graphic overlays, anodized metal signs and identification plates, direct printing on metal objects, various sealing and isolation solutions, as well as assembly of custom products. At the request of customers, provides a wide range of services, from the development of prototypes to the delivery of the final product.

Silva Artimoviča

+371 20299021

silva@smartteh.eu

SmartTEH designs and builds automated loading systems that make cargo handling faster, safer, and more cost-efficient – protecting cargo, reducing injury risk, and cutting operational costs.

Trusted by businesses in over 30 countries, SmartTEH delivers measurable value across industries including metalworking, wood processing, construction, logistics, warehousing, and beyond.

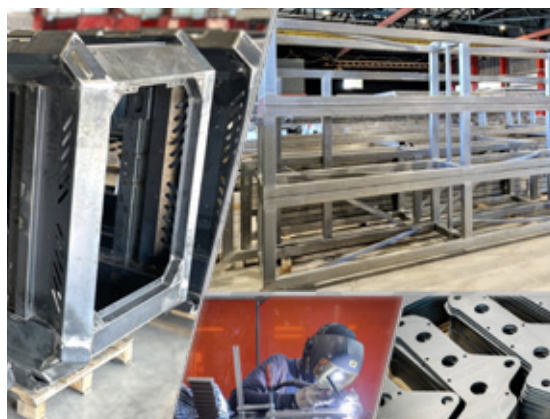

Guntis Dlohi

+371 29258562

guntis@steelprofi.lv

Metalworking subcontractor with large experience in stainless steel metalworking from sheet metal.

Small and medium batch production from parts to full assembly or ready product.

Jānis Šelegovskis

+371 28350789

janis@marmors.lv

TETRALIA is the biggest producer of screw piles and other welded steel piles in Baltic states.

Besides piles we also offer steel constructions for infrastructure builders – bridges, towers, portals, pilons and many more products. We offer small to large batch production. Robotic welding available for up to 4000mm long parts. Our production is EN1090 exc3 certified. CNC plasma and gas cutting available for parts up to 3000*12000 mm, up to 200 mm in thickness.

Since 2010, we have been the leading metal construction manufacturer in the Baltic States.

In our work, we combine the latest machine capabilities with high-quality handmade craftsmanship.

We focus on quality in production: manufacture of stairs and railings, balconies, Laser cutting, sheet bending, construction manufacturing & powder coating.

Dāvis Ansons
+371 27276018
toget@toget.lv

With over 60 years of experience, VALPRO stands as one of the Latvia's leading metalworking companies. VALPRO provides a complete product cycle - from the creation of blanks to the assembly of finished products. We are proud to offer specialized metalworking services that are rare in Latvia. One such service is deep drawing, a highly efficient metal – forming process that transforms flat metal sheets into products with complex shapes. At VALPRO, we specialize in custom-ordered parts, delivering tailored solutions that meet the highest standards of excellence.

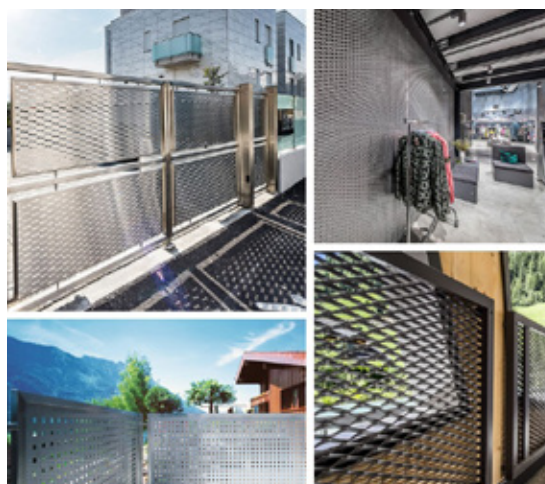

Mārtiņš Orskis

irt@irt.lv

Supplier of different kind machine tools and service provider:

- BODOR LASER sheet, tube and profile cutting machines
- RAFAMET railway stock wheelpair lathes and other machine tools for railway stock repair
- PILOUS bandsaws
- All types of sheet metal processing machine tools – shears, press brakes, sheet metal bending rolls, punching machines, bevelling machines
- All types of tube and profile processing machines
- CNC and conventional type lathes, milling and drilling machines
- RIX SAGEN saw blades

Linde Gas produce and supply industrial and medical gases in Latvia. Company is a part of Linde plc. which is a leading global industrial gases and engineering company with 2023 sales of billion. We live our mission of making our world more productive every day by providing high-quality solutions, technologies and services which are making our customers more successful and helping to sustain, decarbonize and protect our planet

Agnis Gūtmanis, +371 29259536, agnis.gutmanis@linde.com

Marcegaglia Baltics was born in 2023 from a team of professionals who has been in business for over 25 years and has a distinguished reputation in the steel distribution and processing sector. The manufacturing plant in Riga, Latvia is dedicated to the production of carbon steel sheets and strips for a wide range of applications.

Viktor Lukjansky, +371 29234821, viktor.lukjansky@marcegaglia.com

Customized pneumatic sets for automation, energy efficiency pneumatic solutions, pneumatic cylinders, valves, electric actuators, air preparation, fittings & tubing, vacuum elements, process valves, flow and pressure switches

Guntis Kārklīšs, +371 28391007, guka@smc.lv

kaspars.dreiblats@stokker.com

Stokker has more than 30 years of experience in sales and service of tools and machinery.

We offer high-quality industrial equipment:

- Welding equipment and fume extraction systems from the world's leading manufacturers. Lincoln Electric, Bohler Welding, Plymovent
- Unique welding robot "Co-Bro" UR10e technology
- Inventory management equipment SMARTSTOKK
- Ingersoll Rand screw compressors and pneumatic tools
- Metal processing workbenches
- Industrial power generators and battery energy storage systems

WALDEC GROUP (LATVIA)

www.waldecgroup.com

Stand C-8

(Hall 2)

Waldec Group is a leading supplier of machines, tools, spare-parts and consumables to the metal, rubber, plastic, heat treatment and polyurethane industries. It acts as an agent and distributor for renowned world brands. Waldec prides itself on providing high-quality products and effective customer service. It operates in the Nordic and Baltic countries from local regional offices.
